

Dear Sirs;

I fully support the well founded Comment submitted by The American Radio Relay League (ARRL) concerning Docket ET 03-104.

I conclude the comments made by proponents of Broadband over Power Line (BPL) have neither little if any credible scientific data, nor little if any testing to support approval of this docket at this time.

Further research and innovations in BPL will be needed to avoid the risk that this innovative technology will cause irreparable interference to services (including those used by Homeland Security) licensed to operate in the 2 MHz - 80 MHz frequency range.

Approval of ET 03-104 would violate the existing FCC rules on non-interference and would be contrary to the best interest of our country.
