

I urge you to NOT ALLOW Broadband over Power Lines. Test results I have seen in areas where it is being tested PROVE that IT WILL DESTROY THE ABILITY OF THE AMATEUR SERVICE to use it's bands. Those tests PROVE it is MORE THAN JUST INTERFERENCE. IT OVERPOWERS ALL SIGNALS ON 20 AND 15 Meter amateur bands.

This technology will permanently eliminate the ability of amateurs to serve the public in the numerous ways we do by COMPLETELY Eliminating our ability to communicate anywhere.

This proposal is destructive to the health, welfare, and security of our country. This is particularly crucial to our nation's future security due to the increased threats we face from terrorism and the need to be able to communicate under such serious situations.

If BPL is authorized, the amateur service will be completely wiped out. PLEASE DENY THIS IN THE INTEREST OF OUR NATION'S HEALTH, WELFWARE, AND NATIONAL SECURITY.
