

I support fully the comments of the American Radio Relay League concerning Docket ET 03-104. I believe that the comments made by proponents of Broadband over Power Line (BPL) have little if any credible scientific data to support approval of this docket. In this time of global terrorism, resources such as Amateur Radio, specifically the world-wide bands of 2-80 Mhz are needed for emergency purposes. Approval of ET 03-104 would violate the existing FCC rules on non-interference and make 2-80 MHz unusable and would be contrary to the best interest of the public.
