

I support fully the well founded Comment submitted by the American Radio Realy League (ARRL) concerning Docket ET 03-104. I conclude the comments made by proponents of Broadband over Power Line (BPL) have little if any credible scientific data to support approval of this docket at this time. Further research and innovations in BPL will be needed to avoid interference to services already licensed to operate in the 2 MHz to 80 MHz frequency range. Approval of ET 03-104 would violate the existing FCC fules on non-interference and would be contrary to the best interest of the public.
