Sirs:

I support the well researched comments submitted by The American Radio Relay League concerning Docket ET 03-104. It appears to me the comments made by proponents of Broadband over Power Line (BPL) have little if any credible scientific data to support this proposal at this time. Substantial research and creative methodology in BPL will be needed to avoid the great risk this innovative technology will not cause irreparable interference to services licensed to operate in the 2 MHz - 80 MHz frequency range. Approval of ET 03-104 would violate the existing FCC rules on non-interference and would be contrary to the best interest of the public, particularly in consideration of the needs of homeland security.
