

I Think the FCC should not let Broadband over Power Line (BPL) ever happen. I support The American Radio Relay League concerning Docket ET 03-104. It (BPL) will cause all kinds of noise on the HF bands. We need the HF bands to be noise free. The good old USA needs the HF Ham bands for an emergency like the Midwest power outage or 9/11. We should not jeopardize the security of our country for the sake of the Internet. Please stop this madness and keep the airwaves clear and noise free.
