

Amateurs across the United States provide valuable communications during times of emergency that saves lives. Approving BPL at this time will disrupt amateur HF frequencies thus in time of emergency putting lives in danger.

I support fully the well founded Comment submitted by The American Radio Relay League concerning Docket ET 03-104. I conclude the comments made by proponents of Broadband over Power Line (BPL) have little if any credible scientific data to support approval of this docket at this time. Further research and innovations in BPL will be needed to avoid the great risk this innovative technology will cause to amateur radio services licensed to operate in the 2 MHz - 80 MHz

frequency range. Approval of ET 03-104 would violate the existing FCC rules on non-interference and would be contrary to the best interest of the public.

I have been communicating with my Senator Mitch McConnell and Congressman Ken Lucas in asking for their support in opposing ET 03-104. Please don't allow the power companies to destroy the ham bands for just money. Thank You.
