

Gentlemen... I am writing this brief comment to you in support of the recent Comment submitted by The American Radio Relay League (ARRL) concerning Docket ET 03-104.

Having read much on this subject, it is my belief that the self-serving interests of those seeking a rules change and subsequent implementation of Broadband over Power Line (BPL), are doing so without concern for the interference that it will cause to the radio spectrum, and without sufficient data to support the approval of this docket at this time.

To avoid the great interference risk that this technology will cause to those individuals and services licensed by the FCC to operate in the 2 MHz - 80 MHz frequency range, and to support existing FCC Rules for non-interference, I strongly recommend that the FCC deny and reject Docket ET 03-104 in the best interest of the public.
