

I support Comments by The American Radio Relay League opposing Docket ET 03-104. I agree the comments made by proponents of Broadband over Power Line (BPL) have any credible scientific data to support approval of this docket at this time. Further research and innovations in BPL will be needed to avoid the great risk that this technology will not cause serious interference to Amateur services licensed to operate in the 2 MHz - 80 MHz frequency range. Approval of ET 03-104 would violate the existing FCC rules on non-interference and would be contrary to the best interest of the public.
