

I support the comment by the American Radio Relay League concerning Docket ET 03-104. The comments by proponents of Broadband over Power Line (BPL) have little if any credible scientific data to support approval of this docket at this time. Approval of ET 03-104 would violate the existing FCC rules on non-interference and would be contrary to the best interest of the public. The power companies had best concentrate on preventing a repeat of the blackout and forget about the Broadband over Power Line Docket! Extended power outages are common in our area and Cinergy seems not too concerned about improving restoration of electric service!
