

I would just like to comment as to my opposition to the pending BPL internet capabilities as it relates to me. If this service will corrupt the frequency spectrum as it appears it will, then I am extremely opposed to this proposition. The radio spectrum is there for the use of all Americans not just the internet users. I have been a Ham Radio Operator for over 40 years and have enjoyed it beyond words. To see it destroyed by this "force" is heart-breaking. Internet is available in all kinds of means other than power lines. Ham radio will not be the only radio service destroyed by this BPL plan. We as Hams do not have the political or financial might of the "big utilities" but we have rights all the same.

My opposition will be registered with my Congressmen and Senators.
