

I am a long time member of the American Radio Relay League (ARRL) and I want to give my unqualified support to the comment submitted concerning Docket ET 03-104. I fear that Broadband over Power Line (BPL) could cause substantial and irreparable interference to amateur services that operate in the 2 - 80 MHz frequency range. While I do not oppose progress or innovative communication techniques, the risk associated with BPL outweighs the value of implementation without further study. Please note my concurrence with the ARRL comment and my strong opposition to approval of ET 03-104.
Thank you for your consideration. Ken Welch KB8EWW
