

I wish to register my complete agreement with the American Radio Relay League with regard to Docket ET 03-104. Please include my complete objection to the FCC allowing the Braodband Power Line interests to go ahead with their wishes to use power line transmission for broad band use. This plan has not been thoroughly investigated and for the FCC to impose this interference onto those currently approved users of the 2 MHz-80 MHz frequencies would most certainly not be in the best interest of those currently permitted users. Please deny the use of power line by the advocates of Broadband Power.
