

Florida Power & Light (FPL), in it's comments regarding Broadband Over Power Line (BPL) wrote:

"FPL believes that BPL does not pose significant risks for unintended high frequency radiations that will interfere with consumer devices, amateur radio operators, or other forms of commercial communications (television, radio, mobile radio, etc.)"

I am a licensed medical doctor practicing in Florida and I am concerned that broadband over power lines (BPL) has the potential for interference with communications between hospitals and emergency vehicles. Also, many rural medical services use CB as a back-up which may be compromised as well. In Florida, we depend upon ham radio operators to provide communications in times of natural disasters, such as hurricanes. BPL is a BAD idea and needs to be stopped now.
