

I am opposed to the BPL (Broadband over Power Lines). I have worked hard to obtain my amature class license and don't want to lose valuable radio spectrum due to BPL. I think there would be a valuable loss of emergency communication if the Band spectrum is allowed to be polluted by BPL. Please do not allow BPL to be used. This will ensure Amature Radio's future help and keep emergency communications more viable during times of disaster. With the introduction of BPL there will be fewer HAMs because of the noise pollution that would exist on HF and MHF. Please consider Amature Radio Operators as a valuable resource and to refuse BPL.
