

I am a licensed Amateur Radio Operator (AG4UT), and I would like to go on record as being OPPOSED to the proposed Broadband over Power Line (BPL) system due to its potential harmful interference to the Amateur Radio Service. It has the potential to do to the Amateur Radio Service similarly as NEXTEL is doing to Public Safety. Let's not make the same mistake again in this rulemaking. I live in a rural area without DSL, ISDN, or cable. I don't want advanced technology in my neighborhood at the expense of another more valuable one used for a public service (i.e., amateur radio).
