

As an Amateur Radio licensee, and member of McHenry County, IL  
Emergency Services and Disaster Agency, I am concerned that BPL  
will seriously interfere with emergency communications. Radio  
communications is very difficult when noise is present, and the added  
interference from BPL would make the problem even worse.

In addition, the public would blame radio amateurs for any problems  
with their access, irregardless of the source.  
There are many ways to access the Internet that do not interfere with  
others right to the pursuit of happiness. Unfortunately, BPL is not  
one of them. Please do not allow BPL to come to pass.
