

I have been an amateur radio operator for 15 years. I use HF extensively and the proposed Broadband Over Powerlines is going to seriously impede my operations at any power level. Do not raise the Part 15 limitations, do not allow BPL at any power level. Think about how much radiation that will take place when you feed a conductor 35 feet off the ground at 1-80 MHz. It will radiate and it will interfere with HF communications at any power level. Do not allow this to happen. Myron R. Schaffer
