

I am Commercial GMDSS Radio Operator/Maintainer License DB00000023. I have investigated the Broadband over Power Line (BPL) and concluded this will cause irreparable interference to services licensed that operate in the 2 MHz - 80 MHz frequency range. Approval of ET 03-104 would violate the existing FCC rules on non-interference and would be contrary to the best interest of the public. I support the comments made by The American Radio Relay League concerning Docket ET 03-104. Little if any credible scientific data supports approval of this docket at this time. Further innovations in BPL will be needed to avoid the great risk to the public this technology will cause.
