

I find it very hard to believe that the FCC is willing to pull the plug on Amateur Radio and allow BIG business to ruin the hobby by totally wiping out from 2meg to 80meg with nothing but 20dB over an S9 signal. This hobby has been a huge asset to the United States by providing communications when all else fails in an emergency, not to mention a wonderful hobby that promotes education and innovation in the world of electronics. Please do not allow this mode BPL that is all about making money ruin the lives of so many.

Thank you  
Gordon T. Kolus W8GTK
