

I believe that Comcast has come up with an illegal, back door way to get a rate raise. Previously, subscribers could order pay per view movies. Now this service is no longer available unless one spends an extra \$14/month for digital service. This means that either one pays more for the same level of service or receives less service for the original price. The only things now available on pay per view are specials such as wrestling or rock concerts at a much higher cost per event. Any way Comcast profits. I feel ripped-off. Is there anything that can be done about this?
