**Re: In The Matter Of Improving Public Safety Communications In The
800 MHz Band; WT Docket No. 02-55 (Ex Parte)**

Dear Madam Secretary,

The Avoyelles Parish 911 Center is writing to express its opposition to Nextel's so-called "Consensus Plan" and to urge the FCC to adopt the "Balanced Approach," which was filed on May 29, 2003. As discussed below in greater detail, we believe that the Consensus Plan will unnecessarily jeopardize Public Safety communication systems. Instead, the FCC should adopt a solution, such as the Balanced Approach, that does not require Public Safety licensees to relocate and does not reduce their interference protection

The Avoyelles Parish 911 Center has licensed an 800 MHz communications system, which is used by all Avoyelles Parish Law Enforcement and Fire agencies. The communications system supports a number of Law Enforcement and Fire agency activities including dispatching as well as paging fire agencies

We are concerned that the Consensus Plan's relocation process is extremely complicated and there is no guarantee that Public Safety licensees will be able to continually operate their communications systems during this process. Furthermore, it is unrealistic to expect all Public Safety licensees to relocate in 12 months or less given the complexity of some Public Safety systems

Also, Public Safety licensees could be subject to more interference because the Consensus Plan protects Public Safety licensees only if they meet certain signal strength and receiver requirements. Because most Public Safety communication systems do not meet these requirements, they will have to expend significant resources to ensure that

they are protected from interference. Further, the interference situation could be worse if rebanding is not completed before Nextel's funding runs out.

Therefore, the Avoyelles Parish 911Center supports the Balanced Approach, which is superior to the Consensus Plan because it takes pro-active steps to immediately deal with Public Safety interference by relying on technical solutions and increased enforcement. As a result, this proposal is less disruptive and less expensive than the Consensus Plan so Public Safety communications will not be jeopardized. For all the reasons stated above, the Avoyelles Parish 911Center urges the FCC to adopt the Balanced Approach.

Cordially yours,
