

I am an FCC-licensed Amateur radio operator. I am reading reports that Broadband over Power Lines will eliminate my ability to operate in the public interest in times of National Emergencies. Please follow the recommendations of the national representative of all radio operators like me - The American Radio Relay League - and not enact policies that would make BPL possible. Please see international studies on the matter at:
www.arrl.org/tis/info/html/plc/#amateur_interference_studies

Thank you,
K6POI
