

APPENDIX 'A'
LP-100 AVAILABILITY MAPS

In this Appendix, REC submits state maps that show the availability of LP-100 stations.

The maps are color coded as follows:

White/No Overlay: areas where LP-100 stations are available today with the third adjacent channel restrictions.

Green Overlay: areas where LP-100 stations are currently not available today but would be available if the third adjacent channel protection was lifted. (Former LPFM rules)

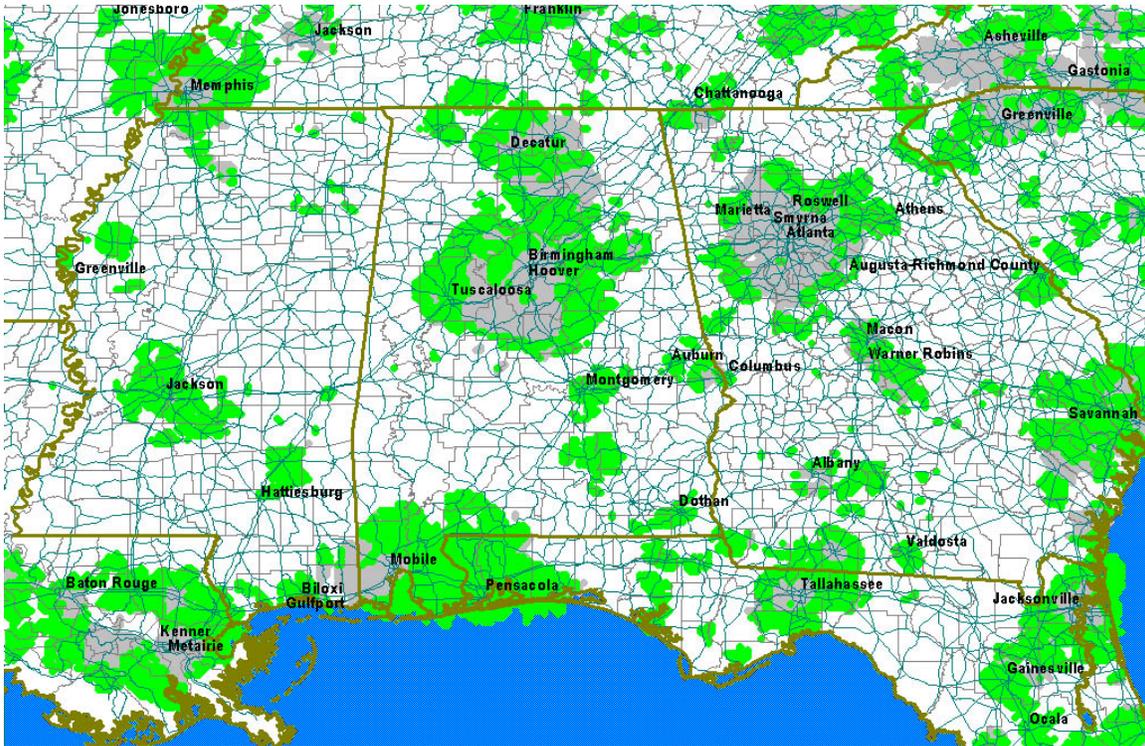

Gray Overlay: areas where LP-100 stations would continue to remain unavailable despite the removal of restrictions on third adjacent channel protection.

Portions of a state not shown on a map is either defined on a different map or if there is no detail on any map for a particular area, the area should be considered "White/No Overlay".

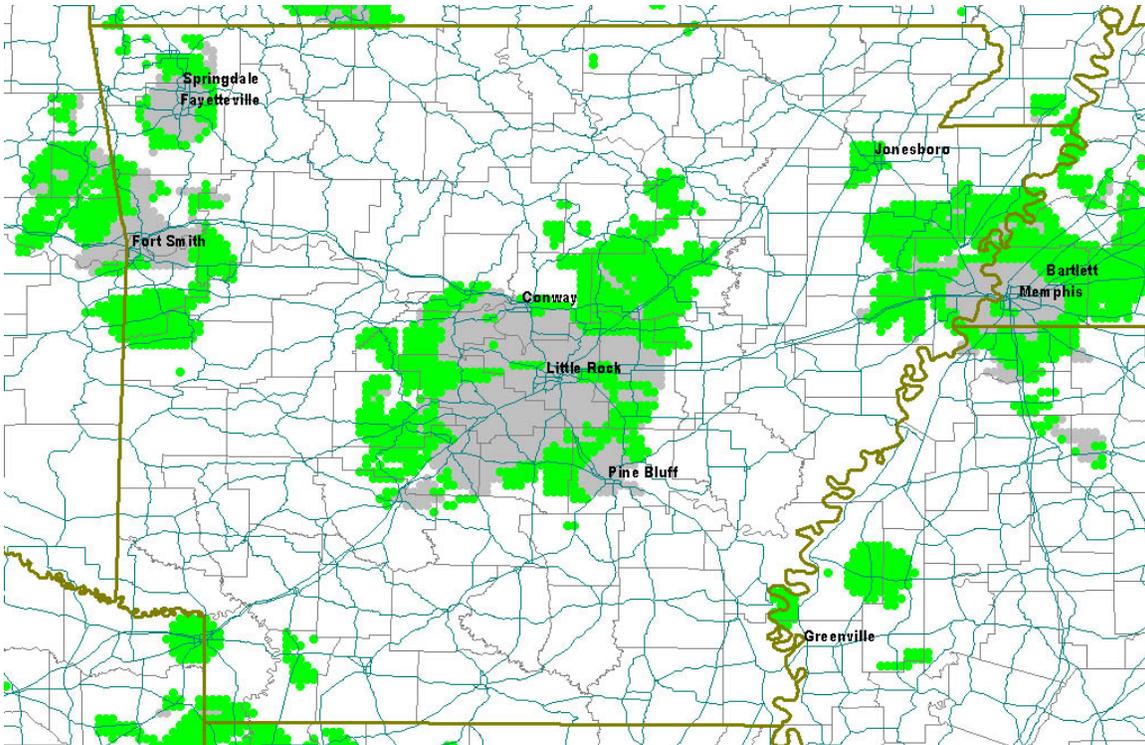

Alaska, Hawaii, Puerto Rico, Virgin Islands and other territories and possessions were not in the scope of the mapping report.

Maps are current as of August 22, 2003 and do take into consideration translator applications filed in the March, 2003 "Great Translator Invasion" window.

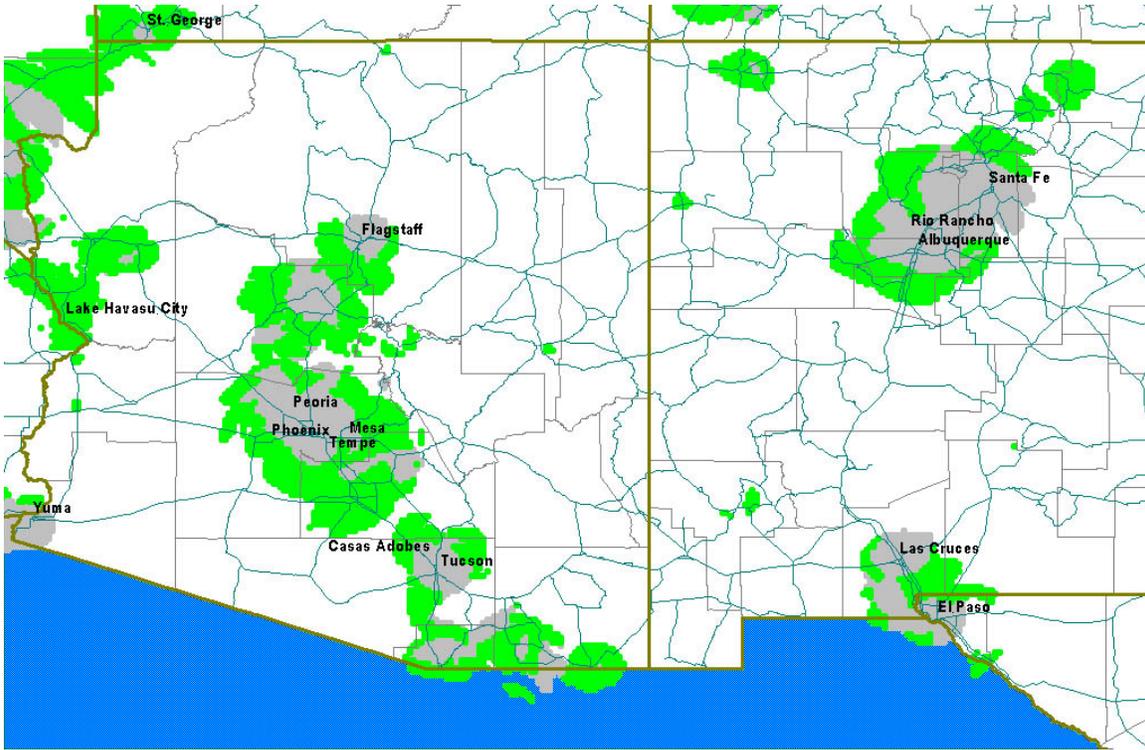

ALABAMA MISSISSIPPI GEORGIA

ARKANSAS

ARIZONA/NEW MEXICO

NORTHERN CALIFORNIA AND NORTHERN NEVADA

SOUTHERN CALIFORNIA/SOUTHERN NEVADA
