

I am a licensed Amateur Radio Operator as well as Military Affiliate Radio System Operator. W2AKT / AFA1RP. My focus has been Public Service and Emergency Operations. The interference and extreme impact on communications would severely impact my ability to provide emergency backup communications supporting Federal, State and Local Government as well as the Military. The public, as the end user of emergency services, is the loser. This period of American history is not the time to tinker. Thank you for your time.
