

You are so stupid to think the people will stand by and let you enrich the corporations by making us buy a convertor for every tv we own. Very few issues make me mad, but you have ticked me off. It is so lame an excuse to get money for the cable, electronics and other big interest groups that support you by the money system known as payoffs. What about the people on SS or the disabled or the poor. What you do? Give out more Federal money on welfare so they can get their inalienable rights to "free tv"?

Give us a break. So unreal. You have given every salesman a scare line to every poor joe (wanting a tv) to overspend beyond what they can afford by simply saying " It's a nice tv and one you that is your budget....but it will be useless without a \$300 converter in 2 years. But you can spend another \$1500 on a unit which you can't make the payments on at 18% and may drive into bankruptcy. Oh and by the way you need a converter for the other 3 tvs you have which you seldom use. Don't forget the portable tvs you have in your rv and camper".

Get the picture? You will be driving the country into a huge debt.

I do not know who owns this guy from La. But you can bet he must be a grandson of the Kingfish. His real name must be Gov La.

I know there real gains from the conversion (\$1000 toilet seats) that only you can appreciate, but us poor overtaxed people can only hope you can see our point
