

I am very dissappointed with the FCC's decision to go ahead with the Broad band over power lines. This will create total havoc on the HF bands and create more problems with not only Ham Radio but also all the other emergency groups as well. Despite the problems the FCC seems to not care for our services and in the eyes of most Hams seems to have taken a cut some where. I am writing my congressmen and Senator.

Were not going to be able to use our equipment even if there was a Declared emergency.
