

I want to express my strong oppositopn to BPL. As an amateur radio operator, I know the critical importance of Ham radio and radio communications in general and particularly during an emergency. BPL is a direct threat. BPL does cause harmful interference. In light of the significant problem of interference frequently created by existing power lines, the introduction of BPL will be a dissaster. Moreover, PBL is unnecessary as access to broadband can and is being provided through numerous other means. Thank you for the opportunity to make my opinion known.
