

In this day of the Global Village, can not we learn from other occupants?

Japan has banned this type of technology.

It was deployed in Scandinavia and turned off because of interference to Medium Wave AM broadcasts.

Listen if you will!

If this type of technology is deployed in the USA! we the people will certainly not be able to listen.

We will not be able to listen to shortwave Broadcast Radio.

We will not be able to listen to AM Broadcast Radio.

We will not be able to listen to Standard Time Broadcasts.

We will not be able to listen to the Shortwave Marine Bands.

We will not be able to listen to the Citizen Bands.

We will not be able to listen to the Ham Radio Bands.

The constitutional right to free speech, implies the right to free listening!

If BPL is fielded in the USA! We will however be able to listen quite clearly to the buzz of the BPL Wasteland!

Happy Legislating!
