

Do not pander to the commercial for profit lobby interests by approving this travesty on our limited communication frequency spectrum. The interference this system would create on current and future spectrum users/licensees will forever damage all we have managed to structure over the years. The spectrum is not the property of the FCC, but a limited resource whose management is held in trust by the government to support the entire public.

At this point we don't even have the benefit of non interested party exhaustive studies that can define the extent of the damage which will be done by approving this proposal.
