

To the Chairman and Members: It would be a violation of the old "PICON" rule for this Commission to approve Broadband over Power Line service. It would not be in the public's interest, it would be convenient only for a handful of businesses, and there has been no demonstrated necessity for it to replace existing services. Even worse, BPL would disrupt communications in the high-frequency range. This Commission does not want that stigma attached to its record. Please: Vote against BPL. Thank you.
