**Subject** Please Support the Consensus Plan -- FCC WT Docket #02-55

Commissioner Kevin J Martin  
Federal Communications Commission  
445 12th Street, SW  
Washington, DC 20554

Dear Commissioner Martin,

Emergency response communications have never been more critical, or more difficult

That's because of a common problem on police, fire and EMS radios interference. Interference, garbled or dropped communications, inhibits first responders from doing their jobs safely and effectively. Essentially, if first responders can't communicate, they can't help and may themselves be in danger.

There is a solution before the FCC the Consensus Plan. Over 300 public safety organizations, local governments, and congressional officials support this Plan because it eliminates interference before it occurs and at no additional cost to federal, state or local budgets or the American taxpayer.

The 300 Consensus Plan supporters that have filed with the FCC, along with John Walsh, host of America's Most Wanted, recognize the importance of communications for America's police, fire and EMS workers. This problem has existed long enough, and our first responders deserve better. I am asking you to help.

Please listen to the voices of public safety. Our neighborhoods, families and fellow public safety professionals cannot afford to wait any longer.

Sincerely,

Debra Koosed  
P O Box 788  
Pacific City, Oregon 97135-0788

cc  
Senator Gordon Smith  
Representative Darlene Hooley  
Senator Ron Wyden

That's because of a common problem on police, fire and EMS radios: interference. Interference, garbled or dropped communications, inhibits first responders from doing their jobs safely and effectively. Essentially, if first responders can't communicate, they can't help and may themselves be in danger.

There is a solution before the FCC: the Consensus Plan. Over 300 public safety organizations, local governments, and congressional officials support this Plan because it eliminates interference before it occurs and at no additional cost to federal, state or local budgets - or the American taxpayer.

The 300 Consensus Plan supporters that have filed with the FCC, along with John Walsh, host of America's Most Wanted, recognize the importance of communications for America's police, fire and EMS workers. This problem has existed long enough, and our first responders deserve better. I am asking you to help.

Please listen to the voices of public safety. Our neighborhoods, families and fellow public safety professionals cannot afford to wait any longer.

Sincerely,

Kim McKeown

Commissioner Kevin J. Martin  
Federal Communications Commission  
445 12th Street, SW  
Washington, DC 20554

Dear Commissioner Martin,

The need for fire personnel to be able to communicate in times of crisis has never been greater.

As a firefighter on the front lines, battling blazes and ensuring the safety of our communities, I urge you to support the Consensus Plan before the Federal Communications Commission (FCC) to prevent CMRS interference to public safety communications systems.

The FCC has made a commitment to all first responders to address this critical issue, and as time passes, our risk from this problem continues to grow.

The Consensus Plan is the only proposal before the FCC that addresses this problem head-on, and is the only proposal that has the support of America's leading public safety organizations, including:

- The International Association of Fire Chiefs
- Association of Public Safety Communications Officials
- The International Association of Chiefs of Police
- Major City and County Sheriff's Associations

Together with the private sector members of the Consensus Plan, more than 90 percent of affected licensees in the 800MHz band have agreed that this is the best way to resolve this problem for public safety - TODAY. And the Plan requires no public money.

We cannot afford to wait any longer. My fellow firefighters and I hope that we can count on your support.

Sincerely,

Richard Lengel
