Chairman Michael K. Powell
Federal Communications Commission
445 12th Street, SW
Washington, DC 20554

Dear Chairman Powell,

Emergency response communications have never been more critical, or more difficult.

That's because of a common problem on police, fire and EMS radios: interference. Interference, garbled or dropped communications, inhibits first responders from doing their jobs safely and effectively. Essentially, if first responders can't communicate, they can't help and may themselves be in danger.

There is a solution before the FCC: the Consensus Plan. Over 300 public safety organizations, local governments, and congressional officials support this Plan because it eliminates interference before it occurs and at no additional cost to federal, state or local budgets - or the American taxpayer.

The 300 Consensus Plan supporters that have filed with the FCC, along with John Walsh, host of America's Most Wanted, recognize the importance of communications for America's police, fire and EMS workers. This problem has existed long enough, and our first responders deserve better. I am asking you to help.

Please listen to the voices of public safety. Our neighborhoods, families and fellow public safety professionals cannot afford to wait any longer.

Sincerely,

Chance Melendez

Interference, garbled or dropped communications, inhibits first responders from doing their jobs safely and effectively. Essentially, if first responders can't communicate, they can't help and may themselves be in danger.

There is a solution before the FCC: the Consensus Plan. Over 300 public safety organizations, local governments, and congressional officials support this Plan because it eliminates interference before it occurs and at no additional cost to federal, state or local budgets - or the American taxpayer.

The 300 Consensus Plan supporters that have filed with the FCC, along with John Walsh, host of America's Most Wanted, recognize the importance of communications for America's police, fire and EMS workers. This problem has existed long enough, and our first responders deserve better. I am asking you to help.

Please listen to the voices of public safety. Our neighborhoods, families and fellow public safety professionals cannot afford to wait any longer.

Sincerely,

Kathleen Mayer

Washington, DC 20554

Dear Commissioner Martin,

Emergency response communications have never been more critical, or more difficult.

That's because of a common problem on police, fire and EMS radios: interference. Interference, garbled or dropped communications, inhibits first responders from doing their jobs safely and effectively. Essentially, if first responders can't communicate, they can't help and may themselves be in danger.

There is a solution before the FCC: the Consensus Plan. Over 300 public safety organizations, local governments, and congressional officials support this Plan because it eliminates interference before it occurs and at no additional cost to federal, state or local budgets - or the American taxpayer.

Commissioner Kevin J. Martin
Federal Communications Commission
445 12th Street, SW
Washington, DC 20554

Dear Commissioner Martin,

I have a personal--as opposed to the "canned letter" here--at the end of this note.

Emergency response communications have never been more critical, or more difficult.

That's because of a common problem on police, fire and EMS radios: interference. Interference, garbled or dropped communications, inhibits first responders from doing their jobs safely and effectively. Essentially, if first responders can't communicate, they can't help and may themselves be in danger.

There is a solution before the FCC: the Consensus Plan. Over 300 public safety organizations, local governments, and congressional officials support this Plan because it eliminates interference before it occurs and at no additional cost to federal, state or local budgets - or the American taxpayer.

The 300 Consensus Plan supporters that have filed with the FCC, along with John Walsh, host of America's Most Wanted, recognize the importance of communications for America's police, fire and EMS workers. This problem has existed long enough, and our first responders deserve better. I am asking you to help.

Please listen to the voices of public safety. Our neighborhoods, families and fellow public safety professionals cannot afford to wait any longer.

I can't understand how this came to happen. Putting cell phone frequencies so close to emergency frequencies should have been foreseen. The popularity of cell phones, I believe, will soon overtake land lines and the cell phone companies are encouraging it, of course. That's the American way. But public safety is much more important than a citizen's right to the convenience of cell phone use and the cell phone's company profit. I say move the frequencies to a higher band and let the cell phone users pay the cost of that move.

Sincerely,

Robert Melbo
