Subject: Please Support the Consensus Plan -- FCC WT Docket #02-55

Commissioner Kevin J. Martin
Federal Communications Commission
445 12th Street, SW
Washington, DC 20554

Dear Commissioner Martin,

Emergency response communications have never been more critical, or more difficult.

That's because of a common problem on police, fire and EMS radios: interference. Interference, garbled or dropped communications, inhibits first responders from doing their jobs safely and effectively. Essentially, if first responders can't communicate, they can't help and may themselves be in danger.

There is a solution before the FCC: the Consensus Plan. Over 300 public safety organizations, local governments, and congressional officials support this Plan because it eliminates interference before it occurs and at no additional cost to federal, state or local budgets - or the American taxpayer.

The 300 Consensus Plan supporters that have filed with the FCC, along with John Walsh, host of America's Most Wanted, recognize the importance of communications for America's police, fire and EMS workers. This problem has existed long enough, and our first responders deserve better. I am asking you to help.

Please listen to the voices of public safety. Our neighborhoods, families and fellow public safety professionals cannot afford to wait any longer.

Can we use a hybrid cellphone- radio which for the majority of the time can be a radio and a cell phone on emergency?

Sincerely,

Peter Vocatura

The 300 Consensus Plan supporters that have filed with the FCC, along with John Walsh, host of America's Most Wanted, recognize the importance of communications for America's police, fire and EMS workers. This problem has existed long enough, and our first responders deserve better.

However, a much better plan exists that will not displace cellular equipment and existed long before Police, Fire and EMS moved into the 800 Mhz band. That plan has the first responders on the 150 and 450 Mhz band where they can easily operate just as they did before they decided otherwise. There was no legitimate reason other than an attempt to move to areas where scanner listeners could not follow to the move to 800 Mhz. Trunking is available on the 450 band if that is the excuse you hear given. It is also available on 800 Mhz

Please listen to the voices of public safety and get them directed away from 800 Mhz. Our neighborhoods, families and fellow public safety professionals cannot afford to wait any longer nor is there legitimate reason to chase the whole cellular phone industry to another band merely because the public safety people want to use a band they don't really need.

Dear Commissioner Martin,

Dear FCC.

My name is David Hogue, I was at my house watching AMW and it was brought to my attention that there is a communication problem with the EMS, and police officers. I'm twenty one years old and graduating fire academy with my twin brother Michael Hogue. I also have a room mate named officer John Cruz who is twenty years old and has a three year old daughter. Officer Cruz brought it to my attention that his radio had gone out in many traffic stops. Which if there was something to happen where he couldn't ask for back I would like for you to explain to his daughter why something wasn't done. Thank you for your time.

Subject: Please Support the Consensus Plan -- FCC WT Docket #02-55

Commissioner Kevin J. Martin
Federal Communications Commission
445 12th Street, SW
Washington, DC 20554

Dear Commissioner Martin,

Emergency response communications have never been more critical, or more difficult.

That's because of a common problem on police, fire and EMS radios: interference. Interference, garbled or dropped communications, inhibits first responders from doing their jobs safely and effectively. Essentially, if first responders can't communicate, they can't help and may themselves be in danger.

There is a solution before the FCC: the Consensus Plan. Over 300 public safety organizations, local governments, and congressional officials support this Plan because it eliminates interference before it occurs and at no additional cost to federal, state or local budgets - or the American taxpayer.

The 300 Consensus Plan supporters that have filed with the FCC, along with John Walsh, host of America's Most Wanted, recognize the importance of communications for America's police, fire and EMS workers. This problem has existed long enough, and our first responders deserve better. I am asking you to help.

Please listen to the voices of public safety. Our neighborhoods, families and fellow public safety professionals cannot afford to wait any longer.

Sincerely,

Joyce Parga
