Commissioner Michael J. Copps  
Federal Communications Commission  
445 12th Street, SW  
Washington, DC 20554

Dear Commissioner Copps,

Emergency response communications have never been more critical, or more difficult.

That's because of a common problem on police, fire and EMS radios: interference. Interference, garbled or dropped communications, inhibits first responders from doing their jobs safely and effectively. Essentially, if first responders can't communicate, they can't help and may themselves be in danger.

There is a solution before the FCC: the Consensus Plan. Over 300 public safety organizations, local governments, and congressional officials support this Plan because it eliminates interference before it occurs and at no additional cost to federal, state or local budgets - or the American taxpayer.

The 300 Consensus Plan supporters that have filed with the FCC, along with John Walsh, host of America's Most Wanted, recognize the importance of communications for America's police, fire and EMS workers. This problem has existed long enough, and our first responders deserve better I am asking you to help.

Please listen to the voices of public safety. Our neighborhoods, families and fellow public safety professionals cannot afford to wait any longer.

Sincerely,

Geraldine Yazzie  
P.O Box 4684  
603 Govantti Circle

There is a solution before the FCC: the Consensus Plan. Over 300 public safety organizations, local governments, and congressional officials support this Plan because it eliminates interference before it occurs and at no additional cost to federal, state or local budgets - or the American taxpayer.

The 300 Consensus Plan supporters that have filed with the FCC, along with John Walsh, host of America's Most Wanted, recognize the importance of communications for America's police, fire and EMS workers. This problem has existed long enough, and our first responders deserve better. I am asking you to help.

Please listen to the voices of public safety. Our neighborhoods, families and fellow public safety professionals cannot afford to wait any longer.

Sincerely,

Roland Gonzalez

Commissioner Kevin J. Martin  
Federal Communications Commission  
445 12th Street, SW  
Washington, DC 20554

Dear Commissioner Martin,

Emergency response communications have never been more critical, or more difficult.

That's because of a common problem on police, fire and EMS radios: interference. Interference, garbled or dropped communications, inhibits first responders from doing their jobs safely and effectively. Essentially, if first responders can't communicate, they can't help and may themselves be in danger.

There is a solution before the FCC: the Consensus Plan. Over 300 public safety organizations, local governments, and congressional officials support this Plan because it eliminates interference before it occurs and at no additional cost to federal, state or local budgets - or the American taxpayer.

This problem has existed long enough, and our first responders deserve better. I am asking you to help.

I am an FCC licensed Amateur Radio Operator, and I have also monitored Public Safety Radio for 25 years. I have noticed with some concern the increase in interference from cellular phones. I worked for several years as an unarmed Security Officer, and I KNOW first-hand that a working two-way radio can mean LIFE OR DEATH. Like many First Responders, I spent several hundred dollars for Type-accepted (non-Amateur) radios I needed to insure my safety on the job and off-duty.

Sincerely,

Richard Fleming
