Subject: Please Support the Consensus Plan -- FCC WT Docket #02-55

Commissioner Kevin J. Martin
Federal Communications Commission
445 12th Street, SW
Washington, DC 20554

Dear Commissioner Martin,

Emergency response communications have never been more critical, or more difficult.

That's because of a common problem on police, fire and EMS radios: interference. Interference, garbled or dropped communications, inhibits first responders from doing their jobs safely and effectively. Essentially, if first responders can't communicate, they can't help and may themselves be in danger.

There is a solution before the FCC: the Consensus Plan. Over 300 public safety organizations, local governments, and congressional officials support this Plan because it eliminates interference before it occurs and at no additional cost to federal, state or local budgets - or the American taxpayer.

The 300 Consensus Plan supporters that have filed with the FCC, along with John Walsh, host of America's Most Wanted, recognize the importance of communications for America's police, fire and EMS workers. This problem has existed long enough, and our first responders deserve better. I am asking you to help.

Please listen to the voices of public safety. Our neighborhoods, families and fellow public safety professionals cannot afford to wait any longer.

Sincerely,

Robert Buck

Chairman Michael K. Powell
Federal Communications Commission
445 12th Street, SW
Washington, DC 20554

Dear Chairman Powell,

Emergency response communications have never been more critical, or more difficult.

That's because of a common problem on police, fire and EMS radios: interference. Interference, garbled or dropped communications, inhibits first responders from doing their jobs safely and effectively. Essentially, if first responders can't communicate, they can't help and may themselves be in danger.

There is a solution before the FCC: the Consensus Plan. Over 300 public safety organizations, local governments, and congressional officials support this Plan. It eliminates interference at the expense of everyone involved.

The 300 Consensus Plan supporters that have filed with the FCC, along with John Walsh, host of America's Most Wanted, have distorted the cause of the communications problems that America's police, fire and EMS workers are experiencing. This problem exists due to a host of short comings not the least of which are the inadequate systems designs that the public service customers and the public have been sold, and our first responders deserve better. 800 MHz system designs easily require 50% or more transmitter density than the 400 MHz systems they replaced. I am asking you to help.

Please exercise your responsibilities as unbiased arbiters and demonstrate leadership in devising a technically effective solution. Our neighborhoods, families and fellow public safety professionals deserve the truth.

Unfortunately, by making this issue into a political issue, America's Most Wanted has lost all credibility, thus destroying their authority to be a voice of public safety organizations!

As a police officer, wife and more recently a mother of 3, I value my life. I have noticed that on many calls for service I respond to, I am unable to reach other officers or dispatchers when needed. I have been recently enlightened by this show what one of the problems may be.

I have taken an oath to ensure the safety and wellbeing of others and I do this without hesitation, but most of all I do this having faith in my training, my back up and that my equipment will work the way it should. You come to depend on your only form of communication when your on a job and to believe that this could not be readily available due to the numerous amount of cell phone towers and conflicting radio frequencies, is an uneasy feeling.

My goal everyday is to keep people safe, but most importantly, it's to come home to my husband and children, so I hope that this situation can be rectified with an urgency to help keep myself and all other Law Enforcement and Fire Officials safe in the future, so we don't have to take any additional risks that are not necessary.

There is a solution before the FCC: the Consensus Plan. Over 300 public safety organizations, local governments, and congressional officials support this Plan because it eliminates interference before it occurs and at no additional cost to federal, state or local budgets - or the American taxpayer.

The 300 Consensus Plan supporters that have filed with the FCC, along with John Walsh, host of America's Most Wanted, recognize the importance of communications for America's police, fire and EMS workers. This problem has existed long enough, and our first responders deserve better. I am asking you to help.

Please listen to the voices of public safety. Our neighborhoods, families and fellow public safety professionals cannot afford to wait any longer.

Sincerely,

Harley La Brec

Subject: Please Support the Consensus Plan -- FCC WT Docket #02-55

Commissioner Kevin J. Martin
Federal Communications Commission
445 12th Street, SW
Washington, DC 20554

Dear Commissioner Martin,

Emergency response communications have never been more critical, or more difficult.

That's because of a common problem on police, fire and EMS radios: interference. Interference, garbled or dropped communications, inhibits first responders from doing their jobs safely and effectively. Essentially, if first responders can't communicate, they can't help and may themselves be in danger.

There is a solution before the FCC: the Consensus Plan. Over 300 public safety organizations, local governments, and congressional officials support this Plan because it eliminates interference before it occurs and at no additional cost to federal, state or local budgets - or the American taxpayer.
