Subject: Please Support the Consensus Plan -- FCC WT Docket #02-55

Commissioner Michael J. Copps
Federal Communications Commission
445 12th Street, SW
Washington, DC 20554

Dear Commissioner Copps,

Emergency response communications have never been more critical, or more difficult.

That's because of a common problem on police, fire and EMS radios: interference. Interference, garbled or dropped communications, inhibits first responders from doing their jobs safely and effectively. Essentially, if first responders can't communicate, they can't help and may themselves be in danger.

There is a solution before the FCC: the Consensus Plan. Over 300 public safety organizations, local governments, and congressional officials support this Plan because it eliminates interference before it occurs and at no additional cost to federal, state or local budgets - or the American taxpayer.

The 300 Consensus Plan supporters that have filed with the FCC, along with John Walsh, host of America's Most Wanted, recognize the importance of communications for America's police, fire and EMS workers. This problem has existed long enough, and our first responders deserve better. I am asking you to help.

Please listen to the voices of public safety. Our neighborhoods, families and fellow public safety professionals cannot afford to wait any longer.

Sincerely,

Liz Dabler
5225 Pooks Hill Rd.

Dear Commissioner Copps,

I strongly back up the Consensus Plan 100%. I am a Security Officer here in California and have had trouble with my radio. I was very scared and didnt know what to do. Our men and women Police Officers, Firefighters and Emergency Response Personnel need all the airwaves as possible. I have watched the news and have been outraged with the fact that our Police Officers have been shot at, and it is happening more and more. It is very crucial for them being able to contact their dispatchers. The United States is highly targeted by terrorists and the people we civilians need and depend on is our Police Officers, Firefighters and Emergency Response Personnel. I would be devastated if one of my loved ones was severely injured and could have been saved in time but only to the fact they passed on because on of our Police Officers couldnt call for Emergency Response. After watching Americas Most Wanted and hearing of this, I disconnected my cell phone and wont get another one. I am in the process of getting into the Police Academy and believe me, I want to do my job to the best that I can. Our Officers took their vow, "To Protect and Serve," Lets be sure and take every effort to ensure the safety of their lives and ours. Who knows the next life they save, could be yours!!

Interference, garbled or dropped communications, inhibits first responders from doing their jobs safely and effectively. Essentially, if first responders can't communicate, they can't help and may themselves be in danger.

There is a solution before the FCC: the Consensus Plan. Over 300 public safety organizations, local governments, and congressional officials support this Plan because it eliminates interference before it occurs and at no additional cost to federal, state or local budgets - or the American taxpayer.

The 300 Consensus Plan supporters that have filed with the FCC, along with John Walsh, host of America's Most Wanted, recognize the importance of communications for America's police, fire and EMS workers. This problem has existed long enough, and our first responders deserve better. I am asking you to help.

Please listen to the voices of public safety. Our neighborhoods, families and fellow public safety professionals cannot afford to wait any longer.

Sincerely,

Dennis Marsh

Dear Commissioner Adelstein,

Emergency response communications have never been more critical, or more difficult.

That's because of a common problem on police, fire and EMS radios: interference. Interference, garbled or dropped communications, inhibits first responders from doing their jobs safely and effectively. Essentially, if first responders can't communicate, they can't help and may themselves be in danger.

There is a solution before the FCC: the Consensus Plan. Over 300 public safety organizations, local governments, and congressional officials support this Plan because it eliminates interference before it occurs and at no additional cost to federal, state or local budgets - or the American taxpayer.
