

After hearing about BPL and what chaos it WILL cause, on a SW radio broadcast, I must go on record in saying I am against this!! I've been an SWL since I was 13, and I am now 56 yrs. old. I most certainly realize the importance of radio communications of ALL types. I cannot stress enough the importance of the use of radio in our daily lives because lives and livelihoods depend so much on radio, of ALL frequencies!! I do not want to lose my hobby, or see the end of emergency help in all phases, due to a total blackout caused by this government and the use of BPL!! I furthermore believe we are slowly losing our freedoms to big business in a very sneaky fashion. I speak for ALL the SWL's, Radio Amateurs, Police, Fire, FEMA, US Military and any other organization in which RADIO is used as a hobby, US Security, or to save lives, when I say this is very wrong and needs to be prevented. We've had quite enough taken away from the "Average" man!! I am too upset to continue any further!! Thank you for listening.

Most sincerely,  
Harvey F. Bell
