

BPL, FEMA, and Amature Radio. I find it beyond belief with all the data from previous BPL trials overseas and its detrimental impact on amature radio (as well as other bands), this systems seems to be on the fast track toward implimentation.

Considering the present state of threats we face (natural and foe), our government (including the FCC) should be looking out for the good of the nation. FEMA does not want BPL, the amature radio community does not want BPL. I don't want it. Do what is right for our country and national security. Keep BPL out of the US.
