

I love my country and I love my hobbie of amatuer radio. When our country needs us in times of emergencies, amatuer operators come in numbers on a volunteer basis. I am now calling on my country (FCC) to make the right choices in BPL. Test have already shown BPL causes harmful interference with the HF frequencias on the amatuer bands. This is our backbone to emergency communications. BPL does nothing but defeat our purpose of homeland security. Please sirs, if you must go forward with BPL, make the neccessary rules to protect the amatuer bands.

Sincerely

John S. Shafer (KD5MLY)
