

As a shortwave listener, I was first opposed to BPL because of the interference to my listening. But as I looked into it more, it is apparant that BPL could be disastrous for fire, police, paramedic, airline, and MILITARY communications.

For these reasons, I urge the FCC to reject current BPL technology. It is an unnecessary risk to take for a country "at war" and concerned about Homeland Security. The governments of Japan, Great Britain, and Australia already have rejected BPL technology for these very reasons.
