

It's another sad day for Americans and a huge blow to freedoms granted to America's Citizens through our US Constitution and the bill of rights.

It has become apparent that commissioners of the FCC, past and present. Are not interested in enforcing the highest laws of the land written by our forefathers to insure ONE NATION UNDER GOD, INDIVISIABLE FOR LIBERTY AND JUSTICE FOR ALL, AKA FREEDOM! Instead they abuse the powers afforded them by the common man who pays their salaries by moving America more toward a Hitler state daily!

I started in communications at a very young age of 12 tinkering with radios was fascinating and fun. I respected and supported all US and International Radio Law's.

Slowly the FCC took freedom and inalienable rights away from the people. It started with big money pressure and lobbyists either paying off the FCC's commissioners or our law makers.

One day the airwaves were not free any more. We were told we couldn't monitor certain frequencies like Cell Phone, Satellite ect. For example, in the old days, if you could build a receiver to pick up a frequency it was fair game but was kept confidential as to not violate privacy! But we must have brought our commissioners from the cold war USSR. Because they enacted the silly law's and abused their power. The people in post cold war Russia are not fined or locked up for monitoring frequencies, but Americans are. GO FIGURE, You must ask yourself have we become the USSR that President Regan and the American People so deeply feared and hated.

Now I read today that the FCC is now in the business of regulating FREEDOM OF SPEECH! By fining broadcasters that carry Howard Stern. I am not a Stern fan; I think he is a jerk! But he should have the right to express himself freely with out the FCC imposing their values and the values of the 60's hippies now born again! There still is freedom of choice in America. If you don't like what you're hearing there is a tuner and an on/off button! The huddled masses are trained to use these buttons and knobs. Contrary to popular belief even our children know how to use this device and its buttons!

Why don't you dedicate your time to making America a better place? You're considering radiating everyone with broadband through Phone and power lines and interfering with other services in the radio spectrum. I guess it's the FCC's new and improved Russian Woodpecker?? Where did your Commissioners and Field Engineers get your Radio and RF Training? Out of a Cracker Jack Box or maybe you did well on the civil service exam, Aka Non-Creative thinker exam (SHEEP EXAM)! Maybe you attended a fine school like MIT or Caltech? If you did you were unlike Clinton. You must have inhaled!

I would like to thank you for your time in reviewing my complaint against the FCC and its civil employees and hopefully this letter will enlighten you think before doing something stupid in the future!

Somewhat Respectfully Submitted

Anthony E. Marquette, Common Man
