

I feel you are pushing BPL prematurely. Please wait for all the facts and reports to be filed. I do not believe that current part 15 rules would afford adequate protection to licensed radio services in either near or far field settings. I further believe that equipment technology for BPL is not ready at this point for wide deployment. We must protect all current licensed incumbents at all cost, This is part of the F.C.C.s job . thank you for reading this. Charles Case
