

Broad Band over Power/Phone Lines is something that should not be even considered. The damage done to general/emergency communications would be vastly greater than the good done in high speed access!...What will the cost/implications be to each municipality. as well?...What will happen to the spirit of American radio receiving and broadcasting?...If the answer is not something we are absolutely proud of, then we cannot let Broadband for Power/Phone Lines come to pass.

Sincerely,

Matthew R. Ehlers (N2RQX)
