

Commissioners: Amateur radio access to portions of the spectrum is the equivalent to the public's access to the national park system. The air waves are a natural resource and a national treasure and amateur radio is the primary avenue of enjoyment of them by the regular citizen. Please do not allow BPL to pollute this resource. Amateur radio is pro-family and pro-education; access to this wholesome activity, like access to our national parks, is a legacy I would like to see my children and my children's children enjoy. Pollution of the natural resource could destroy it.
