

Bpl will Make useless the Short Wave Broadcast bands and Ham radio Bands . America need a emergency back up communications in the case of a Emergency as was made obvious by 911 . Amature radio is a proven plus in all disasters .With multiple choices such as Cable , Satellite , DSL as well as Cordless Connections and Dial Up the market is already over developed and the fact that Blp will have no changes in price of any service listed above show there is no need for BPL . America already has access to Broadband with several choices . Many are already talking about how the F.C.C is unfairly influenced by the Indusrty , even Republicans .If BPL passes it will only prove it. It is important the F.C.C relize there actions influence the public opinion of them . ;- ) thank you . kd5dfm John Lepire
