

I advocate NO CHANGES to existing Part 15 rules governing BPL currently. Thus far the full impact of the service on amateur radio operation is unknown however I cannot help but be concerned that the Commission has adopted a posture of rapid implementation of the service despite the qualified testimony of experienced electronics experts advising a more cautious approach. I would feel much more confident in the Commission if some assurance to the Amateur Service could be seen, i.e. consideration of reports of BPL intrusiveness.

Best Regards,

Joseph Varino/K5PMS
