

Please, Please!! do not allow BPL. Being an experanced ham operator and electronic technician. I know it is going to cause havoc with not just the amateur ham frequencies, I know it will be a disaster for lots of other people including the ordinary person with just plain old am radios.

Please consider not to allow it!!!

In times of emergancy with the hams and when most needed, this will surly interfere.....There are so many people that I talk to that are so aganst it. Also because of more then you will be able to handle with all the complaints you will receive!!
