

Good Evening: I have serious concerns and reservations about the effect of the proposed BPL on the amateur radio HF bands. I have been an amateur radio operator for 43 years, and most recently have been involved with emergency response. Worked 3 weeks at Ground Zero in NYC following the 9/11 event. What would have happened if the HF bands had been so noisy with BPL-generated interference that our vital communications would have been impossible, I wonder? Seems to me that BPL should be scrapped in light of the likely problems. Thank you, W.D.(Doc)Lindsey, ARS K0EVZ Amateur Extra Class.
