

You are receiving this email in response to your inquiry to the FCC.

Dear Sirs and Madams:

Please carefully consider the Broadband over Power Lines (BPL) carefully!!!

It sounds great, in theory but it will virtually wipe out nearly all Short Wave Bands, Amateur High Frequency Bands, MARS emergency communications in the horrific event that the Muslim terrorists should ever attack us again (God forbid!)

Please DO NOT implement BPL! The Japanese and several EU countries have tried it and panned it because of ALL the static/interference it creates.

Thank you for your time and consideration!

God bless America!

Sincerely,

Dirk M. Sutton
